

WordPress 2.0.5 is ready

Those who were waiting for **WordPress 2.1** including me will certainly please to know that **WordPress 2.0.5** is just got available for WP-Testers. This is the sign that WordPress 2.1 isn't far, most probably just a month or so.

General users won't notice any major changes in WordPress 2.0.5, since actually this isn't for general users. But for developers it is a big bang, which will give them a sneak pick of upcoming 2.1 and they can prepare themselves. [Mark of WordPress](#) sorted a list of major changes done in WordPress 2.0.5. Developers should take a look at that.
